

## Installing a 2,5" P-ATA hard disk drive in Fbox-PC barebone

Open the socket head screws with the L-shaped hexagon key at the side, where the COM ports and also the parallel port are the nearest:

Remove the screws of the HDD mounting unit:

The HDD gets connected to the IDE cable, like shown in the picture:

The 4 screws of the HDD are needed to install the HDD onto the mounting unit:

Install the HDD mounting unit into the enclosure again:

Close the enclosure and screw it tight – Finished!
